**Overall project quality**

**Comments:**

A major improvement from the prior design. The more minimalistic, cleaner design is pleasing.

**Project contains an appropriate amount of information to meet its objectives.**

**Comments:** Less is more here. The font size and amount of information on the prior design was too much. Here, a user can find the information wanted with at most one click through.

☐ 1   ☐ 2   ☐ 3   ☒ 4   ☐ 5

**Quality of elements making up project (HTML/CSS, photos, vector graphics, video, audio, animation, web objects/elements)**

**Comments:**

Front page “storm” design is cool - it has edges that make it look like a sticker which I am guessing would make sense for the users (do they often put stickers on snowboards?).. I would suggest either fully committing to the sticker design fully or remove the slight irregular edges.

**Project design (color, fonts, typography, layout/composition). The overall concept/theme/unified look of the website is effective.**

**Comments:**

Some of the fonts have small lines in them. I'm not sure if these are intentional. Some of the spacing is odd and there are some misspellings (skateboarder is misspelled on about screen, buttons should have consistent capitalization) . The overall concept/theme/design is great but some details could be ironed out a bit more. Color choices and amount of contrast are good.

**Did you experience any technical difficulties as you navigated through the website or displayed the project?**

**Comments:** No general navigation issues.. But the tab on browser should be named to reflect the website always (when on the about tab (when on the riders page,I see “about” as the tab name which reflects neither the website nor the content).
